MIURA C37 DISC

THE BEST FOR CLINCHER.

Road racing cycling wheel Miura C37 is the Ursus concept for clincher. A 37 mm profile UD monocoque rims with HPS shield that provides improved dissipation of heating derived from prolonged braking on the carbon. Equipped with aluminum hubs featuring low friction technology Ursus BBS, carbon-aluminum hubs are available as well on request.

WEIGHT

FRONT WHEEL	REAR WHEEL
796 g	910 g

TECHNICAL DETAILS

WHEELS	HUB	SPOKES
Material: Monocoque 100% unidirectional carbon fiber	Front: XD30F Also available: TA 12X100; TA15X100, 100X9	Head Type: bent head
Height profile: 37 mm, Wide profile: 26 mm	Rear: XD30R Also available: TA142X12; 135X10	Nipples: Brass external thread lock system
Rim holes: front 24 holes, rear 24 holes	Material: Forged alloy hub on seal ball bearing	Number of Spokes: 24 front and 24 rear
Braking surface: carbon	Braking system: Disc international standard 6 holes	Spokes: SAPIM CX-Sprint 2° crossing
Diameter valve hole: 6 mm	Quick Releases: Ursus WB63 alloy quick release	
Advised Tires: Tire 28" diam. 700x23 and 700x25		
Rim designation: ETRTO 622x17C		

PERFORMANCES
